

Project Development Phase

Sprint Delivery 2

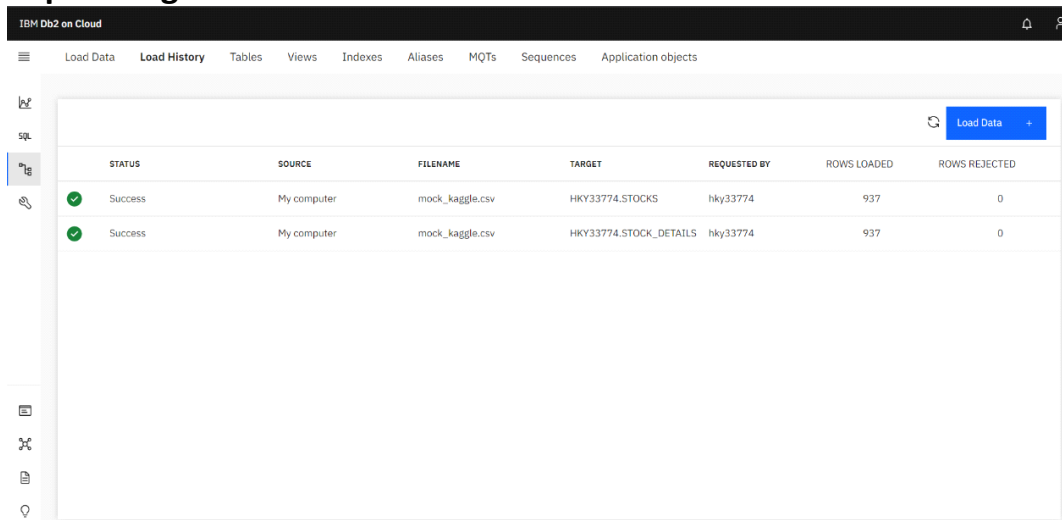

Team ID	PNT2022TMID49721
Project Name	Retail Store Stock Inventory Analysis

Project Development Phase:

Sprint 2:

- Uploading the dataset into the database cloud in IBM
- Connecting the database and fetching the data from IBM db2 database
- Prepare the dataset and doing the relationship

Uploading Dataset into DB2:

The screenshot shows the IBM Db2 on Cloud console interface. At the top, there's a navigation bar with 'Load Data' and 'Load History' tabs. Below this, a table displays the load history. The table has columns for STATUS, SOURCE, FILENAME, TARGET, REQUESTED BY, ROWS LOADED, and ROWS REJECTED. Two rows are visible, both with a 'Success' status. The first row shows a file named 'mock_kaggle.csv' loaded into 'HKY33774.STOCKS'. The second row shows the same file loaded into 'HKY33774.STOCK_DETAILS'. A 'Load Data' button is visible in the top right corner of the table area.

STATUS	SOURCE	FILENAME	TARGET	REQUESTED BY	ROWS LOADED	ROWS REJECTED
Success	My computer	mock_kaggle.csv	HKY33774.STOCKS	hky33774	937	0
Success	My computer	mock_kaggle.csv	HKY33774.STOCK_DETAILS	hky33774	937	0

Database Connection with Cognos:
